SUMMARY

MCA graduate with experience building full-stack applications using React, Node.js, Express, FastAPI, MongoDB, and Redis. Built and optimized systems involving REST APIs, Docker-based code execution, Redis caching, and AI-integrated features.

EDUCATION

Master of Computer Applications	2024 – 2026
Sikkim Manipal Institute of Technology	CGPA: 8.69/10
Bachelor of Computer Applications	2021 – 2024
Techno India University	CGPA: 8.39/10

TECHNICAL SKILLS

Languages	Python, JavaScript, Java
Frontend	React.js, HTML, CSS, Tailwind CSS, Redux, Zustand
Backend	Node.js, Express.js, FastAPI, REST APIs
Databases	MongoDB, Redis, SQLite
Tools	Git, Docker, Postman, Jest, Pytest

EXPERIENCE

Android Developer Intern - EduSkills Remote	Apr 2024 – Jun 2024
- Developed Android applications using Kotlin and Android Studio, implementing responsive UI components and application logic. - Debugged and tested applications, resolving implementation issues during assignments and assessments.	

PROJECTS

CodeNest AI-Powered Cloud IDE	Live GitHub
Tech Stack: React.js • Zustand • Express.js • Docker • MongoDB Atlas • Redis • Groq Llama-3.3-70B	
- Developed a cloud IDE with isolated Docker container based code execution and 5-second timeouts, supporting concurrent users with zero cross-contamination. - Designed a 25-job asynchronous execution pipeline with dedicated workers to handle concurrent requests and prevent resource exhaustion. - Integrated Groq Llama-3.3-70B for code review, debugging, and flowchart generation, reducing response latency to 1–3 seconds with Redis caching and an in-memory fallback. - Improved state management by replacing nested React Context with Zustand, reducing unnecessary re-renders across authentication, project, and version state.	
InsightATS AI Resume Screening Platform	Live GitHub
Tech Stack: React.js • Redux • FastAPI • Redis • BERT • RoBERTa • DistilBERT	
- Built a full-stack hiring platform that scores candidates on Project Complexity and Contextual Resume–JD Matching beyond keyword-based screening. - Integrated fine-tuned BERT, RoBERTa, and DistilBERT models for resume parsing, resume-JD matching, and project classification, achieving 0.75 F1 and 0.78–0.93 Macro F1. Reduced model inference latency by 51% using lazy model loading and Redis caching. Optimized batch resume scoring against shared JDs, reducing client-server API requests by up to 90%.	

CERTIFICATIONS

IBM Professional Certificate: Full Stack Software Developer	Credential
Google AI Essentials	Credential
